

Brainstorming and Prioritizing Inquiry Questions

1. Brainstorm responses to the following questions:
- What questions do we have about our topic or focus?
 - What do we need to know that we don't know?

2. Review the brainstormed list for overlap and connections. Cross out redundant questions.
3. Create question clusters by putting related questions together, combining and revising questions as necessary. Place the clusters in the boxes below, adding more boxes if necessary.

Cluster 1	Cluster 2
Cluster 3	Cluster 4

4. Discuss which questions are most important to the group.
